

The Melange *Collection*

The fabrics in the Melange Collection are made with more than one colour. This is done by either using more than one fibre or made with different individually dyed yarns.

This creates a rich, luxurious textured effect and a unique two-tone appearance which is what makes Melange so popular.

The Melange Collection is made from a practical and durable Olefin yarn which is put through a calendaring process for improved utilization and handling.

The Collection has a high resistance to abrasion making it suitable for high traffic areas in both domestic and contract environments. The Collection comes in a range of favoured and fashionable colours.
