

The Upholstery Patterns Collection

All our fabrics adhere to the South African National Standards (SABS/SANS) testing, with a minimum abrasion of 15000 rubs.

These upholstery fabrics are manufactured primarily for strength, using man made fibres like Polyester, Polypropylene and acrylic, which we combine with other natural fibres such as linen and cotton.

The average width of these upholstery fabrics is 140cm wide. SABS specifications call for upholstery fabrics to have a minimum seam allowance of 15mm, with 4-5 stitches per cm.
